

## CH-CTAHD5 CVBS + AHD Tester

**Tests cameras and monitors**

**Tests all Chipatronic cameras, CVBS and AHD**

- 5" LCD displays camera image

Use the tester to setup car and caravan cameras without having to have the car monitor on.

Allows installation and alignment by a single person.

Check camera function at connection points.

- 4 Pin AV Cable

(RCA adaptor is optional)

Directly connects to all caravan and commercial style cameras from Chipatronic.

Optional RCA adaptor, CH-4FRCAM connects to standard RCA camera.

12V power to camera supplied from the tester.

- Suitable for programming *Hybrid* cameras

Chipatronic *Hybrid* cameras can be checked and programmed easily with this tester as well as ensuring correct setup and diagnosis in AHD mode.

- Colourbar output to check monitors

Video output allows testing of monitors and cables from the camera end to confirm that signal is available.

- 5V USB output

USB port can provide 5V output to check accessories.

LED light included.
